DESIGN THINKING

SELF-SERVICE COIN CENTERS

MODEL 909 FULL SORT
MODEL 928 MIXED OUTPUT

Ideal for institutions with weight lifting restrictions

Using our design thinking approach focusing on what's important to you:

- Creating a positive experience
- Simplifying operation
- Minimizing interaction
- Quiet, non-disruptive operation
  — Optimum speed to meet noise reduction requirements

DESIGN FEATURES

1. **Interactive Touch Screen Display** Enhances balancing, bag removal and reporting functionality — giving instant access for bag status, end-of-day reports and transaction history
2. **Integrated Debris Removal Tray** Removes dirt, foreign objects, and liquids
3. **Pull-out Shelf** Easy access to the entire counting and sorting mechanism
4. **Continuous Cleaning Mechanisms** Remove sand and other small objects during counting process; Automatic debris ejection system removes non-coin debris to trash receptacle
5. **Bag Management Section** Direct access to all bags through secure doors; coins feed directly into bags at floor level, minimizing lifting which allows for easy bag removal. Model 909 full sort to 9 Bags. Model 928 mixed output to 8 bags.

A panel of LED lights are integrated into the design to attract customers and indicate status to the users. They can be adapted to any desired color scheme to match the surroundings.
